

BioInfect 2016

Conference

A major 1-day conference looking at the critical issues relating to the development of new anti-infectives and the endemic problem of resistance

Thursday 3rd November

**Alderley Park Conference Centre
Cheshire**

Antimicrobial resistance threatens the effective prevention and treatment of an ever-increasing range of infections caused by bacteria, parasites, viruses and fungi. It is an increasingly serious threat to global public health that requires action across all government sectors and society.

Come along to hear from leading national and international experts and learn how they are all playing their part in tackling this key issue.
