

# Laboratory consumables, laboratory chemicals and low-value apparatus for Bionow Premium Members

## About Fisher Scientific

As the UK's leading supplier of laboratory chemicals and equipment, Fisher Scientific distributes own label and branded products to 40,000 customers in the British Isles and selected overseas markets, with our UK distribution centre and headquarters in Loughborough employing 450 people.

The breadth and depth of the Fisher Scientific product range creates a virtual one-stop shop for scientists, a scenario which is conducive to long-term supply contracts and resulting price stability.

The Fisher Scientific 'shop window' is a dynamic, fully interactive web catalogue that provides real-time stock availability and a considerable range of customer oriented features. This is supported by a series of paper catalogues covering the entire breadth of general laboratory activity. In the UK, over 170,000 products are listed.
